Landoll 850 25' finish-all.

Kioti LB1914, 4WD, ldr.

THERE IS ONLY ONE. THE ORIGINAL SUNFLOWER.

DIG IT.

Heavy-duty construction, outstanding clearance and superb flotation. What else do you need to know about the Sunflower 5000 Series field cultivators? How about the fact that the 3" x 4" (76 mm x 102 mm) rectangular tube frame provides the strength today's high horsepower tractors require, and Sunflower computer-aided design creates optimum shank placement for unmatched clearance. Or that the Model 5035 features single-point depth control with rephasing lift cylinders... all covered under our three-year warranty. Or that shanks are available in either spring tension or S-tine design and offer up to 190 pounds (86 kg) of point load for extra tough conditions.

Need more? Okay. Walking tandems and 9.5L (241 mm) tires provide the necessary flotation you need and want in a field cultivator, and the self-leveling hitch maintains a level frame from the front to rear regardless of operating depth.

Any more questions? See us today.

## High Field Productivity with Forward Fold Popularity.

### 8180 Series Forward Fold Planter

Speed, accuracy and efficiency are all key factors within the narrow window of opportunity during planting season. From the moment you enter the field, the 8180 Series is unfolded and in planting mode in a couple of minutes. Once in planting mode, you can cover up to a full 40' (12.2 m) each pass, allowing you to precisely plant hundreds of acres in a day. When finished, quickly fold to a narrow 15' (4.6 m) from the convenience of the cab for transport to the next field.

The integral 3"x3" (7.6 cm x 7.6 cm) fertilizer bar provides the ideal platform for mounting a wide selection of optional fertilizer openers. In addition, it enhances structural integrity of the main frame, making the planter the best choice for challenging no-till conditions. The planter accepts conventional, min-till or no-till fertilizer openers that allow you to precisely place starter fertilizer at the selected depth.

#### Optional Equipment

Flat Fold Breakaway Markers  
Liquid Fertilizer • Dry Fertilizer • Granular Chemical  
Standard-Duty or Heavy-Duty Down Pressure Springs
