## Because Every Pound Counts

Increase your feed efficiency and rate of gain with a fabric building indoor feedlot. The natural light, open space and superior air quality combine to create a comfortable environment for your cattle, free of stress, that'll keep them coming to the feed bunks.

With trusses that are Hot-dipped Galvanized post fabrication and a roofing material that has a warranty regardless of what is in the building, you can have peace of mind knowing this building will last from generation to generation!

Trusses available from 24'-300' wide clear span.

*Building strength and confidence through experience.*
