

## Preventative Maintenance

Regular maintenance of your center pivot irrigation is paramount to getting the best performance from your equipment next summer. Motor and wheel gear service, lubrication and system drainage, when we are done, we will give you a report of all recommended repairs. We also can pump out your underground lines.

## Stay clean...Let us get dirty!

Face it, burying pipe is a dirty job and not very enjoyable. Let FSI do the dirty work. We can dig the trench, install pipe, risers, fittings and wire (if needed) and pour the thrust blocks. We will then backfill and level the site.

We can arrange for under road boring and secure permits if needed.

**So stop getting dirty.  
Call FSI today!**
