**THE RUST
STOPS HERE!**

OVER RUST™ is a unique chemical process that stops rust dead in its tracks! It is the only effective way to totally eliminate destructive rust.

OVER RUST eliminates the need for sandblasting, grinding, disassembly, reassembly and the prolonged down-time that is associated with conventional methods of rust treatment.

OVER RUST is easy to use, and its application requires no sophisticated equipment. OVER RUST is applied directly onto the rust. Then, as it cures, it bonds to the metal and forms a tough, black polymer type coating that has actually permeated the rust and etched itself directly into the metal. This finished product is paint-ready and guaranteed to offer you years of trouble-free protection.

PLIA-SYSTEMS

PLIA-DIKE

An attractive and economical alternative to concrete, the popular Plia-Dike is constructed with tough, preform panels. The preformed steel walls are not affected by freezing and thawing temperatures. Plia-Dike's polyethylene and synthetic rubber construction is unaffected by freeze and thaw cycles and provides resistance to many chemicals.

PLIA-LINERS

If you have or are planning to build an earthen or concrete dike, Hunter can custom-fit your system with an XR-5 or Polypropylene liner. Since Hunter liners have up to a 20-year plus weather warranty, this makes your dike virtually maintenance free. They are resistant to tearing and geological instabilities.

Norwesco Tanks All Sizes

fertilizer
spreader,
6-ton &
8-ton,
8" chain.

Candler
8-ton
fertilizer/
lime
spreader.

DURA-ABS™ DI

*Automated
Direct Injection*

The **Dura Auto-Batch System DI** (Automated Direct Injection) works by direct injecting herbicides into the carrier flow while filling the sprayer.

A Cost
Effective Solution to
Automation

Increase
PROFITABILITY
with a Dura-ABS DI
Direct Injection

How it Works

1. Select the volume desired
2. Press START
3. The pump will begin to inject fluid then automatically shut off upon completion

- Lowest cost automated sprayer filling system
- Filling your sprayer has never been easier or faster
- Reduces operator error and herbicide exposure
- Provides recirculation, maximizing chemical performance
- Accurately dispenses repeatable batches
- Eliminates cross contamination
