IN STOCK

THE RUST STOPS HERE!

OVER RUST™ is a unique chemical process that stops rust dead in its tracks! It is the only effective way to totally eliminate destructive rust.

OVER RUST eliminates the need for sandblasting, grinding, disassembly, reassembly and the prolonged down-time that is associated with conventional methods of rust treatment.

OVER RUST is easy to use, and its application requires no sophisticated equipment. OVER RUST is applied directly onto the rust. Then, as it cures, it bonds to the metal and forms a tough, black polymer type coating that has actually permeated the rust and etched itself directly into the metal. This finished product is paint-ready and guaranteed to offer you years of trouble-free protection.
