

FRone SAVINGS!

Give Your Milk Production a Push

New technology is valuable when it saves time, reduces labor, and provides a quick return on your investment

The GEA FRone, fully automated feed pusher, moves feed toward the feed line at the time you define and according to the routes you set. This ensures that your cows have access to fresh, high-quality feed around the clock. This, in turn, benefits you as your cows' rumen health and dry matter intake improves, their milk yield increases. The FRone is a valuable addition to any dairy farm that wants to optimize their feeding program.

It's good to be home after a job well done

There is nothing like the feeling of getting the job done with reliable and efficient equipment.

The GEA Steerable Liquid Manure Spreaders are designed and manufactured to easily operate on all types of terrains — even in extreme conditions. In addition to the power steering system and the hydraulic suspension on each wheel, many other options and tool bars are offered to ease your work in the field. GEA provides state-of-the-art equipment for any size operation.
