

Bear Claw 40T Rock Trailer

This beast has a load capacity of 40 ton. The hydraulic, up and over tailgate makes it a breeze for unloading.

The Hardox steel body (not in just the floor) will withstand the toughest jobs you throw at it. Dumping this beast is made easy from the tapered body design. The design helps with reducing drag on the side walls when dumping, which will make unloading quicker.

Hydraulic jack for easy unhooking, and a rubber ride hitch that dampens vibration in the tongue during road travels.

Don't worry about stopping it, this trailer has hydraulic brakes on all four corners.

Highway stub axles are used for easy maintenance, and parts replacement.

Front and rear mud flaps help keep the mud kick off to a minimum, and the road lights make it easier to be seen.

The 750/60R30.5 tires will help float this thing around the work area.

Time To Think About The Silage!

That's right, it is time to think about silage again, and Roberts Dairy Service, can help you with the handling of that silage with a new BearClaw silage trailer.

With models from the 1440, 1850, to the rugged 2260, we have you covered.

The tapered body design, helps to reduce drag on the sides when dumping. Which helps to empty at a lower dump height. The drop-down side extensions allow you to switch between silage, and grain hauling. Front, and rear mud flaps, road lights, hydraulic jack.

Defining your needs: No matter if you are a 500, or a 3,500 cow dairy. BearClaw should have a trailer that fits your needs, with keeping your budget in mind.

Durability: Highway stub axles, Rubber ride hitch (That dampens vibrations in the tongue when road traveling.), Slave cylinder kit (Helps with reducing oil capacity requirements).

Harsh conditions: It is important to choose a trailer that is built to last and that can withstand rough terrain and heavy loads. With all the added features, it's easy to see how the BearClaw is built to withstand most of the harshest conditions.

Stop in and see the all new 2260 BearClaw silage trailer at our Saint Johns location. With its 850/50R30.5 Tire/Wheel upgrade, its hydraulic brakes, additional rear grain doors, & a load capacity of 61,600 pounds...

You will quickly realize that this unit is ready to work!
