

SENECA

INNOVATING THE FUTURE OF BARN VENTILATION

STOP CRANKING! SAVE TIME & MONEY AND GET HIGHER MILK YIELDS.

SENECA AUTOMATION

Superior Curtain System

- Top Drop – allows for upper air ventilation in cooler weather
- Double Rollup – more control over ventilation and bedding saver
- Heavy duty 15 oz., poly reinforced, UV and abrasion resistant fabric
- Direct Drive system - NO pulleys or cables, EVER!

Smart Motor Technology

- Innovative encoders provide precision position control
- Move a fraction of an inch at a time, if necessary
- Smooth movement and Integrated Braking System
- Reduced stress on fabric for life expectancy of up to 15 years

Automatic Operation

Open and close based on: Farmer Settings, Temperature, Rain, Wind Direction, and Wind Speed

Manual Override

Take complete control with the flip of a single switch

Powerful light weight motors

90 VOLTS OF POWER

Significantly more torque than
24v system
