PRO-FEED
2020

SELF-PROPELLED FEED PUSHER

OVERVIEW ADVANTAGES OF THE AUTOMATIC FEED PUSHER:

- The unique concept of the auger is to push the silage or hay back to the animals in a fluffy way, thereby increasing odor and palatability. It is well known that the silages and forages served like this increase the dry matter consumption and consequently the production of milk.
- A robust, waterproof controller with a 10" (254mm) touch screen is very easy to use. The menu is simple and user-friendly; you only need to follow the instructions given on the screen.
- Can also be controlled from your computer, tablet and cell phone; no matter where you are, even at the beach or in your tree stand!
- If there is a problem, the Pro-Feed 2020 will notify you by text message (SMS).
- Our specialists can check the settings and install upgrades, if required, remotely via Wi-Fi.
- Works with two 12V 105Ah gel batteries that require no maintenance and has a long service life.
- The motors are brushless and maintenance free.
- Electric loading station is a simple 1/8" (3mm) plate that is very resistant even to the load of a tractor.
- Simple, effortless and intuitive installation.
- Overall dimensions: 79" x 43-1/2" x 33-1/2" (2,000mm x 1,100mm x 850mm)
- Weight: 1540 lbs (700kg)
