

# DRYHILL Mfg

**Dryhill lagoon pumps, 32' to 62' lengths. Immediate availability.**

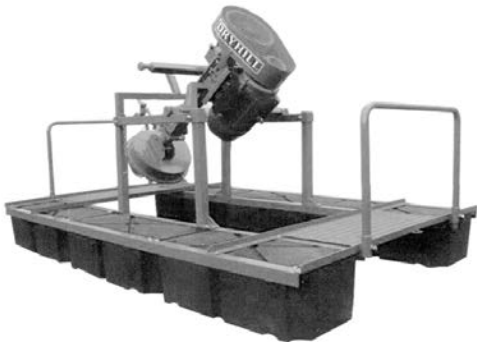

Available with twin motors for places where 3-phase is an issue.

Agitation Nozzle Available.

Available with swivel to move prop from side to side.

**Dryhill vertical electric transfer pump. Available 8' to 14'.**

**The Cadillac of the electric pump series allows you to pump and agitate. Available in 4" with 20 hp, up to 8" with 80 hp electric motor.**

**Ask Dan about discounts up to \$18,000.**

**Superior agitation even with sand-laden manure.**

- 4,200 to 7,400-Gal. haul capacities. 1600-2800 GPM discharge rates.
- Fully independent hydraulic suspension.
- Front pump system featuring AR-400 steel impeller blades and housing.
- 6" Diameter steel discharge line with double thick elbows in high-wear areas.
- In-tank, low-level agitation package keeps sand in suspension.
- Designed, engineered and manufactured by Patz Corporation, a Wisconsin, family-owned company.

**Fully independent hydraulic system** allows each wheel to move independently, keeping equal weight distribution. Self-steering axle(s) minimizes tire damage and stress on wheel bearings, spindles and axles. Allows for sharper turning radius with minimal tire scrubbing.
