Dayton & Baldor Motors,
 most hp & phase models in stock.

The Best Agri-Business Bins!

Schuld/Bushnell bins are available from 4'8" to 12' diameter with a load range from 1 to 140 ton capacity. Three bin groups specifically designed for feeds, bean meal & di-cal and calcium phosphate plus 45° and 60° hopper bins for materials weighing 60 lb., 80 lb. or 100 lb. per cu. ft. These bins are designed and build to meet specific requirements and eliminate problems commonly experienced when handling particular products in other bins.

**PORTABLE DRYERS
 INCREASE YIELDS AND
 IMPROVE PROFITS**

HIGHLIGHTS

- Harvest your grain earlier at higher moisture levels and dry it in bins on the farm, increasing yields and improving profits.
- Shorten wait time during drying, minimize weather risks, reduce dry matter losses, and reduce head shatter loss.
- Single, double or triple module models available.
- All heat or Dry/Cool operation types.
- LP or natural gas.

NOW IS THE TIME TO BUY
 GSI is there to help you stay in the black. Drying your own grain with a highly efficient GSI dryer saves you money and improves your harvest flexibility. A GSI on-farm storage system gives you the marketing flexibility to capture the best prices when the time is right — which can make a big difference to your bottom line.

Increase marketing flexibility, reduce yield loss and speed through harvest with a GSI grain system.

**BOTTOM LINE
 DIFFERENCE**

**TAKE ADVANTAGE OF
 EARLY HARVEST**

**GSI Single Module
 Portable Dryers**

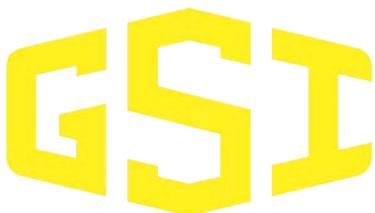

GSI single module portable dryers allow you to start harvesting your grain earlier at higher moisture levels and to dry it in bins on the farm, increasing yields and improving profits. You'll shorten wait time during drying, minimize weather risks, reduce dry matter losses and reduce head shatter loss.

Drying Capacity: up to 1330 BPH all heat @ 5 PT. removal

Operation Type: all heat or dry/cool

Fuel: LP or natural gas

Max. Capacity: up to 3640 BPH

STORAGE + CONDITIONING + MATERIAL HANDLING + STRUCTURES
